**CEF Days
Brussels**

Igoumenitsa Port Authority is heading to Brussels for Connecting Europe Days 2026

From **28 September to 1 October**, Europe's mobility community comes together to discuss the future of a more competitive, resilient, connected and sustainable European transport system.

As a partner of **WATERBRIDGING**, Igoumenitsa Port Authority will contribute to this European dialogue by showcasing the project's work towards smarter, greener and more seamlessly connected waterways across the Adriatic-Ionian Region. WATERBRIDGING brings together **8 partners from 6 countries**,

combining digital innovation, sustainable port solutions and pilot actions designed to strengthen waterborne transport as a competitive alternative within Europe's transport network.

 On **30 September**, join us for **“Smart and Green Ports in the ADRIAN Region”**, a joint session by **WATERBRIDGING** and **AIMPRESS**, bringing together complementary approaches to port decarbonisation, digitalisation, onshore power supply and the transition towards smarter and nearly zero-emission port systems.

For Igoumenitsa, participation is also an opportunity to bring the experience of a strategic Adriatic-Ionian gateway into the wider European conversation — turning regional cooperation, innovation and sustainability into practical solutions for the **ports of tomorrow**.

Connecting regions. Sharing knowledge. Building smarter and greener ports.
